Super Screen

Our Super Screen comes as the standard screen. It is bug resistant and a high quality material which will withstand temperature and hard environments.

Pet Screen

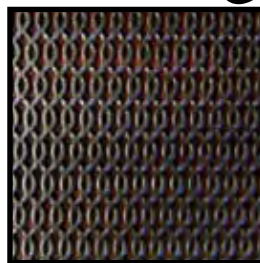

The Pet Screen is a bug screen that is snag-resistant. When pulled or snagged, the Pet Screen will reform to it's original position. It is a heavier material, but will allow for efficient air flow.

Metal Mesh

Metal Mesh is a steel mesh in place of the screen material. This is solid metal, and does allow for ventilation, and does impede visibility unless up close.

Pet Guard

Pet Guard is a metal grid applied to the inside of the door, and may be accompanied by a screen. This is recommended for dog lovers, who want to protect the door and screen.
